JUL 1 - 1936
UNIVERSITY OF ILLINOIS

NOTES.

(1) *Period covered by the Accounts.*—Under the provisions of the Law, the particulars in respect of imported goods from which the official trade statistics are compiled are allowed to be given by importers or their agents at any time within 14 working days after the arrival of the ship. Further extension of time is given within which to make any necessary amendments. Such particulars may also be accepted before a ship actually arrives. In the case of exported goods the information is required to be supplied within six days after the final clearance outwards of the exporting ship. It follows that the statistics published for a month do not precisely represent the imports and exports which occurred in that period. In general, the figures show the trade, as declared by importers and exporters on the documents received in the Statistical Office, Customs and Excise, London, during a month, inclusive of all amendments relating to former months received in that Office during the month. The present issue relates to the month of June in each of the years 1913, 1919, and 1920, not in the current year and the two preceding years, as was formerly the practice.

(2) *Classification of Articles.*—The Tables have been rearranged throughout in accordance with the new Import and Export List which was introduced on the 1st January 1920. The three principal classes are as before, viz. :—I. Food, Drink, and Tobacco ; II. Raw Materials and Articles mainly unmanufactured ; III. Articles wholly or mainly manufactured ; but Class IV. now includes only Animals not for Food, the other articles formerly included therein having been distributed among the other groups, while Parcel Post now becomes a new Class V. The number of groups within these classes has been increased from 30 to 41. In Class I. there are two new groups, "Animals, living, for food" and "Feeding-stuffs for animals." In Class II. there are three new groups, viz., "Non-metallic mining and quarry products" ; "Silks" ; and "Rubber." In Class III. there are four new groups, "Coke and manufactured fuel," which has hitherto been put with "Coal" in Class II. ; "Earthenware, Glass, Abrasives, &c." ; Oils, fats, and resins, manufactured" ; and "Rubber manufactures" ; while four sub-groups under the general group of Yarns and textile fabrics, viz., of Cotton, Wool, Silk, and Other textile materials, have become independent groups. One former group, "New Ships," is merged in the group of "Vehicles," which also includes aircraft as well as land vehicles.

(3) *Value.*—The values of the Imports represent the cost, insurance, and freight ; or, when goods are consigned for sale, the latest sale value of such goods. The values of the Exports represent the cost and the charges of delivering the goods on board the ship, and are known as the "free on board" values.

(4) *Arrangement under Countries.*—Imports are classified as received from the countries whence they were consigned to the United Kingdom. The countries whence goods are consigned are not in all cases the countries of actual origin of the goods, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to the United Kingdom. In such a case the second country would be the country of consignment to which the goods would be credited in these Accounts. Exports are

O 0.15—v 1750 & 90 7/20 A

credited to the country of final destination as declared by exporters in their entries, whether that country possesses a sea-board or not.

(5) *Alterations in Countries.*—Trade with Alsace-Lorraine has been credited to France from 1919 onwards. The boundaries of the various European countries, and the assignment of territories in Africa and elsewhere, have not yet been finally settled. It has not been possible, therefore, to recognise any other changes in the limits of the countries previously shown.

(6) *Definition of Countries.*—Throughout these Accounts the expression "United Kingdom" is used to include Great Britain, Ireland, and the Isle of Man.

In the tables of Imports and Exports—

British India includes the whole of India, except French and Portuguese Possessions.

British East Indies includes British India, Straits Settlements (with the Federated Malay States and Labuan), and Ceylon.

British South Africa includes the Union of South Africa (*i.e.*, Cape of Good Hope, Natal, Orange Free State, and Transvaal), and Rhodesia, Bechuanaland Protectorate, Basutoland, and Swaziland.

British West Africa includes Gambia, Sierra Leone, Gold Coast, and Nigeria.

British East Africa includes Zanzibar and Pemba, East Africa Protectorate, Uganda Protectorate, and Nyasaland Protectorate.

(7) *Transit Trade.*—Goods in transit, whether on through Bill of Lading or otherwise, are included in the tables of Imports and of Exports of Foreign and Colonial Merchandise, except such goods as are removed under bond from the importing to the exporting ship at the same or another Port. Accounts of these Transhipments under Bond are given in Volume II. of the Annual Statement of Trade.

(8) *Dutiable Goods.*—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts such corrections are embodied in the totals of Imports for the expired portion of the current year. The quantities "entered for home consumption" are the quantities delivered on payment of duty. In order to arrive at the quantities "retained for home consumption," the quantities exported on drawback, &c., are subsequently deducted.

(9) *Shipping.*—The Tables of the movements of shipping in the Foreign Trade which are included in these Accounts relate only to entrances and clearances "with cargo," that is to say, they include only those vessels which arrive at a port or ports in the United Kingdom for the purpose of discharging cargo from abroad or which depart from a port or ports in the United Kingdom after loading there cargo for discharge at a destination abroad. If cargo is unloaded from, or loaded on, a vessel at more than one port in the United Kingdom without an intervening call at a port abroad, the vessel is recorded as "entered" at one only of such ports of discharge or as "cleared" at one only of such ports of loading. The country from which a vessel is recorded as "entered" on an inward voyage is that of the most distant port at which cargo was loaded for discharge in the United Kingdom on that voyage, whether cargo from other countries is also loaded in the course of the voyage or not. Similarly a vessel is recorded as "cleared" to the country of the most distant port of discharge for cargo loaded on the vessel in the United Kingdom on that voyage.

Movements of vessels between ports in the United Kingdom for the purpose of completing the discharge of cargo from abroad, or of completing the loading of cargo for abroad, are not recorded as coastwise voyages.

The record of movements of shipping in the Coasting Trade which are included in these Accounts relate only to the arrivals of vessels for the purpose of discharging cargo taken on board at another port, or other ports. in the United Kingdom, and the departures of vessels after loading cargo for discharge at another port, or other ports, in the United Kingdom. Any voyage which includes a call at a port abroad is not deemed to be a coastwise voyage. In the coasting trade, vessels are "entered with cargo" at every port of discharge and are "cleared with cargo" at every port of loading.

The arrivals of vessels at ports at which no cargo is discharged, and of departures of vessels from ports at which no cargo is loaded, are recorded as arrivals and departures "in ballast." Particulars of such arrivals and departures are excluded from the Tables in these Accounts, but are published in the "Annual Statement of the Navigation and Shipping of the United Kingdom."

(10) *Annual Statements.*—Full particulars of the Import and Export trade in each Article and with each Foreign country and British possession, for a period of five years, are contained in the "Annual Statement of the Trade of the United Kingdom." Detailed information as to Shipping is published in the "Annual Statement of the Navigation and Shipping of the United Kingdom." The 1918 issue of the "Annual Statement of Trade" has been published. The Monthly Accounts of Trade and Navigation for December last contain preliminary information for the year 1919.

SUMMARY TABLE showing the VALUE of IMPORTS, BRITISH EXPORTS, FOREIGN and COLONIAL EXPORTS, and TOTAL EXPORTS, for each MONTH in the YEARS 1913 and 1919, and the completed MONTHS of the CURRENT YEAR.

¶ These quantities represent, in addition to the equivalent of the weight of flour, 28 per cent. of offal, &c., the result of the process of converting grain into flour.

Note.—The equivalents used for converting wheat, barley, and oats from weight to measure are those set out in the Corn Returns Act, 1882, viz. :—60 lbs. to the bushel of wheat, 50 lbs. to the bushel of barley, and 39 lbs. to the bushel of oats.

Note.—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts such corrections are embodied in the totals of imports for the expired portion of the current year.

NOTES.

(1) *Period covered by the Accounts.*—Under the provisions of the Law, the particulars in respect of imported goods from which the official trade statistics are compiled are allowed to be given by importers or their agents at any time within 14 working days after the arrival of the ship. Further extension of time is given within which to make any necessary amendments. Such particulars may also be accepted before a ship actually arrives. In the case of exported goods the information is required to be supplied within six days after the final clearance outwards of the exporting ship. It follows that the statistics published for a month do not precisely represent the imports and exports which occurred in that period. In general, the figures show the trade, as declared by importers and exporters on the documents received in the Statistical Office, Customs and Excise, London, during a month, inclusive of all amendments relating to former months received in that Office during the month. The present issue relates to the month of October in each of the years 1913, 1919, and 1920, not in the current year and the two preceding years, as was formerly the practice.

(2) *Classification of Articles.*—The Tables have been rearranged throughout in accordance with the new Import and Export List which was introduced on the 1st January 1920. The three principal classes are as before, viz. :—I. Food, Drink, and Tobacco ; II. Raw Materials and Articles mainly unmanufactured ; III. Articles wholly or mainly manufactured ; but Class IV. now includes only Animals not for Food, the other articles formerly included therein having been distributed among the other groups, while Parcel Post now becomes a new Class V. The number of groups within these classes has been increased from 30 to 41. In Class I. there are two new groups, "Animals, living, for food" and "Feeding-stuffs for animals." In Class II. there are three new groups, viz., "Non-metallic mining and quarry products" ; "Silks" ; and "Rubber." In Class III. there are four new groups, "Coke and manufactured fuel," which has hitherto been put with "Coal" in Class II. ; "Earthenware, Glass, Abrasives, &c." ; "Oils, fats, and resins, manufactured" ; and "Rubber manufactures" ; while four sub-groups under the general group of Yarns and textile fabrics, viz., of Cotton, Wool, Silk, and Other textile materials, have become independent groups. One former group, "New Ships," is merged in the group of "Vehicles," which also includes aircraft as well as land vehicles.

(3) *Value.*—The values of the Imports represent the cost, insurance, and freight ; or, when goods are consigned for sale, the latest sale value of such goods. The values of the Exports represent the cost and the charges of delivering the goods on board the ship, and are known as the "free on board" values.

(4) *Arrangement under Countries.*—Imports are classified as received from the countries whence they were consigned to the United Kingdom. The countries whence goods are consigned are not in all cases the countries of actual origin of the goods, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to the United Kingdom. In such a case the second country would be the country of consignment to which the goods would be credited in these Accounts. Exports are

credited to the country of final destination as declared by exporters in their entries, whether that country possesses a sea-board or not.

(5) *Alterations in Countries.*—Trade with Alsace-Lorraine has been credited to France from 1919 onwards. The boundaries of the various European countries, and the assignment of territories in Africa and elsewhere, have not yet been finally settled. It has not been possible, therefore, to recognise any other changes in the limits of the countries previously shown.

(6) *Definition of Countries.*—Throughout these Accounts the expression "United Kingdom" is used to include Great Britain, Ireland, and the Isle of Man.

In the tables of Imports and Exports—

British India includes the whole of India, except French and Portuguese Possessions.

British East Indies includes British India, Straits Settlements (with the Federated Malay States and Labuan), and Ceylon.

British South Africa includes the Union of South Africa (*i.e.*, Cape of Good Hope, Natal, Orange Free State, and Transvaal), and Rhodesia, Bechuanaland Protectorate, Basutoland, and Swaziland.

British West Africa includes Gambia, Sierra Leone, Gold Coast, and Nigeria.

British East Africa includes Zanzibar and Pemba, East Africa Protectorate, Uganda Protectorate, and Nyasaland Protectorate.

(7) *Transit Trade.*—Goods in transit, whether on through Bill of Lading or otherwise, are included in the tables of Imports and of Exports of Foreign and Colonial Merchandise, except such goods as are removed under bond from the importing to the exporting ship at the same or another Port. Accounts of these Transhipments under Bond are given in Volume II. of the Annual Statement of Trade.

(8) *Dutiable Goods.*—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts such corrections are embodied in the totals of Imports for the expired portion of the current year. The quantities "entered for home consumption" are the quantities delivered on payment of duty. In order to arrive at the quantities "retained for home consumption," the quantities exported on drawback, &c., are subsequently deducted.

(9) *Shipping.*—The Tables of the movements of shipping in the Foreign Trade which are included in these Accounts relate only to entrances and clearances "with cargo," that is to say, they include only those vessels which arrive at a port or ports in the United Kingdom for the purpose of discharging cargo from abroad or which depart from a port or ports in the United Kingdom after loading there cargo for discharge at a destination abroad. If cargo is unloaded from, or loaded on, a vessel at more than one port in the United Kingdom without an intervening call at a port abroad, the vessel is recorded as "entered" at one only of such ports of discharge or as "cleared" at one only of such ports of loading. The country from which a vessel is recorded as "entered" on an inward voyage is that of the most distant port at which cargo was loaded for discharge in the United Kingdom on that voyage, whether cargo from other countries is also loaded in the course of the voyage or not. Similarly a vessel is recorded as "cleared" to the country of the most distant port of discharge for cargo loaded on the vessel in the United Kingdom on that voyage.

THE LIBRARY OF THE
JUL 1 - 1936
UNIVERSITY OF ILLINOIS

Movements of vessels between ports in the United Kingdom for the purpose of completing the discharge of cargo from abroad, or of completing the loading of cargo for abroad, are not recorded as coastwise voyages.

The record of movements of shipping in the Coasting Trade which are included in these Accounts relate only to the arrivals of vessels for the purpose of discharging cargo taken on board at another port, or other ports, in the United Kingdom, and the departures of vessels after loading cargo for discharge at another port, or other ports, in the United Kingdom. Any voyage which includes a call at a port abroad is not deemed to be a coastwise voyage. In the coasting trade, vessels are "entered with cargo" at every port of discharge and are "cleared with cargo" at every port of loading.

The arrivals of vessels at ports at which no cargo is discharged, and of departures of vessels from ports at which no cargo is loaded, are recorded as arrivals and departures "in ballast." Particulars of such arrivals and departures are excluded from the Tables in these Accounts, but are published in the "Annual Statement of the Navigation and Shipping of the United Kingdom."

(10) *Annual Statements.*—Full particulars of the Import and Export trade in each Article and with each Foreign country and British possession, for a period of five years, are contained in the "Annual Statement of the Trade of the United Kingdom." Detailed information as to Shipping is published in the "Annual Statement of the Navigation and Shipping of the United Kingdom." The 1919 issue of the first volume of the "Annual Statement of Trade" has been published; the second volume will be ready shortly.

SUMMARY TABLE showing the VALUE of IMPORTS, BRITISH EXPORTS, FOREIGN and COLONIAL EXPORTS, and TOTAL EXPORTS, for each MONTH in the YEARS 1913 and 1919, and the completed MONTHS of the CURRENT YEAR.

Peas	436,679	97,039	275,600	61,244	78,587	17,464
Beans, not fresh	667,288	155,701	628,370	146,620	159,602	37,240
Wheat Meal and Flour	2,441,326	¶791,170	1,813,800	¶587,806	2,111,921	¶684,419

¶ These quantities represent, in addition to the equivalent of the weight of flour, 28 per cent. of offal, &c., the result of the process of converting grain into flour.

Note.—The equivalents used for converting wheat, barley, and oats from weight to measure are those set out in the Corn Returns Act, 1882, viz.:—60 lbs. to the bushel of wheat, 50 lbs. to the bushel of barley and 39 lbs. to the bushel of oats.

Note.—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts such corrections are embodied in the totals of imports for the expired portion of the current year.

* The corrected quantities of the imports of Sugar are here given for 1913 and 1919.

† The quantities here shown are exclusive of the deliveries of Refined Sugar which have been produced from duty-paid Sugar returned to refineries to be again refined.

Note.—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts, such corrections are embodied in the totals of imports for the expired portion of the current year.

NOTES.

(1) *Period covered by the Accounts.*—Under the provisions of the Law, the particulars in respect of imported goods from which the official trade statistics are compiled are allowed to be given by importers or their agents at any time within 14 working days after the arrival of the ship. Further extension of time is given within which to make any necessary amendments. Such particulars may also be accepted before a ship actually arrives. In the case of exported goods the information is required to be supplied within six days after the final clearance outwards of the exporting ship. It follows that the statistics published for a month do not precisely represent the imports and exports which occurred in that period. In general, the figures show the trade, as declared by importers and exporters on the documents received in the Statistical Office, Customs and Excise, London, during a month, inclusive of all amendments relating to former months received in that Office during the month. The present issue relates to the month of September in each of the years 1913, 1920, and 1921, not in the current year and the two preceding years, as was formerly the practice.

(2) *Classification of Articles.*—The Tables have been rearranged throughout in accordance with the new Import and Export List which was introduced on the 1st January 1920. The three principal classes are as before, viz. :—I. Food, Drink, and Tobacco; II. Raw Materials and Articles mainly unmanufactured; III. Articles wholly or mainly manufactured; but Class IV. now includes only Animals not for Food, the other articles formerly included therein having been distributed among the other groups, while Parcel Post now becomes a new Class V. The number of groups within these classes has been increased from 30 to 41. In Class I. there are two new groups, "Animals, living, for food" and "Feeding-stuffs for animals." In Class II. there are three new groups, viz., "Non-metallic mining and quarry products"; "Silks"; and "Rubber." In Class III. there are four new groups, "Coke and manufactured fuel," which has hitherto been put with "Coal" in Class II.; "Earthenware, Glass, Abrasives, &c."; "Oils, fats, and resins, manufactured"; and "Rubber manufactures"; while four sub-groups under the general group of Yarns and textile fabrics, viz., of Cotton, Wool, Silk, and Other textile materials, have become independent groups. One former group, "New Ships," is merged in the group of "Vehicles," which also includes aircraft as well as land vehicles. The following classes of goods arriving in this country are not included in the import statistics: (*a*) Personal luggage, including parcels brought

Dep. 1923
D. of D.

Exchange Duplicate, L. C.

by passengers for private use, so long as such parcels do not contain dutiable goods. Dutiable goods contained in passengers' parcels are included in the statistics ; (*b*) fresh fish and shell fish of British taking, landed from British ships arriving direct from the fishing grounds ; (*c*) ships' stores, Military and Naval Stores on board Government vessels, bunker coal, and ballast of no commercial value ; (*d*) mats, sacks, cases, &c., used as packages of imported goods ; (*e*) goods directly imported by Ambassadors and Ministers accredited to this Kingdom ; (*f*) old vessels bought from foreign or colonial owners. The following classes of goods are not included in the export statistics : (*a*) personal luggage and effects ; (*b*) ships' stores, Military and Naval Stores on board Government vessels, and ballast of no commercial value ; (*c*) mats, sacks, cases, &c., used as the packages of exported goods ; (*d*) old vessels sold to foreign or colonial owners.

(3) *Value.*—The values of the Imports represent the cost, insurance, and freight ; or, when goods are consigned for sale, the latest sale value of such goods. The values of the Exports represent the cost and the charges of delivering the goods on board the ship, and are known as the "free on board" values. Both quantities and values are based on the declarations of importers and exporters as subsequently checked by the Customs officials.

(4) *Arrangement under Countries.*—Imports are classified as received from the countries whence they were consigned to the United Kingdom. The countries whence goods are consigned are not in all cases the countries of actual origin of the goods, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to the United Kingdom. In such a case the second country would be the country of consignment to which the goods would be credited in these Accounts. Exports are credited to the country to which the goods are consigned, *i.e.*, the country of final destination as declared by exporters in their entries, whether that country possesses a sea-board or not.

(5) *Alterations in Countries.*—Trade with Alsace-Lorraine has been credited to France from 1919 onwards. In 1921, a revised list of countries has been introduced for the purposes of the official trade statistics affecting countries shown throughout these Accounts for that year as follows, viz. :—

"Russia" no longer includes Finland, Esthonia, Latvia, Lithuania, and the part of Poland formerly Russian territory ;

"Denmark" includes a part of Slesvig formerly German ;

THE LIBRARY OF THE UNIVERSITY OF ILLINOIS JUL 1 - 1938

"Germany" no longer includes Memel, Dantzig, the part of Poland formerly German, part of Slesvig, now Danish, and Luxemburg;

"Austria" and "Hungary," as newly constituted, are now shown separately. Fiume, Liechtenstein, Czecho-Slovakia, and part of the Serb-Croat-Slovene State are no longer included therein;

"Greece" includes the parts of "Turkey, European," ceded to her;

"Turkey, European," is now practically represented by Constantinople only;

"Turkey, Asiatic," no longer includes Smyrna, Syria, Palestine, Armenia, and Mesopotamia.

(6) *Definition of Countries.*—Throughout these Accounts the expression "United Kingdom" is used to include Great Britain, Ireland, and the Isle of Man.

In the tables of Imports and Exports—

British India includes the whole of India, except French and Portuguese Possessions.

British East Indies includes British India, Straits Settlements (with the Federated Malay States and Labuan), and Ceylon.

British South Africa includes the Union of South Africa (*i.e.*, Cape of Good Hope, Natal, Orange Free State, and Transvaal, and from 1921, the Protectorate of South West Africa), and Rhodesia, Bechuanaland Protectorate, Basutoland, and Swaziland.

British West Africa includes Gambia, Sierra Leone, Gold Coast, Nigeria, and, from 1921, British Togoland and British Cameroons formerly included in German West Africa.

British East Africa includes Zanzibar and Pemba, Kenya Colony, (formerly known as East Africa Protectorate), Uganda Protectorate, Nyasaland Protectorate, and, from 1921, Tanganyika Territory, formerly included in German East Africa.

(7) *Transit Trade.*—Goods in transit, whether on through Bill of Lading or otherwise, are included in the tables of Imports and of Exports of Foreign and Colonial Merchandise, except such goods as are removed under bond from the importing to the exporting ship at the same or another Port. Accounts of these Transhipments under Bond are given in the "Annual Statement of Trade."

(8) *Exports.*—Exports of Foreign and Colonial Merchandise include not only goods in transit through the United Kingdom (unless transhipped under bond), but also all goods which have not had their value sensibly modified by any process of refining or manufacture,

although they have remained for some time in the United Kingdom. Thus goods which have been merely sorted, repacked, or blended, are treated as Foreign or Colonial, but goods which have undergone any other process are included under the head of Exports of the Produce or Manufacture of the United Kingdom, as are also all goods exported by Parcel Post.

(9) *Dutiable Goods.*—The Import Accounts of Dutiable Goods are compiled from estimated quantities supplied to the Customs by Importers, and are subject to correction, both as to quantities and as to value, when an official account has been taken by the Department. In subsequent Monthly Accounts such corrections are embodied in the totals of Imports for the expired portion of the current year. The quantities "entered for home consumption" are the quantities delivered on payment of duty. In order to arrive at the quantities "retained for home consumption," the quantities exported on drawback, &c., are subsequently deducted.

(10) *Shipping.*—The Tables of the movements of shipping in the Foreign Trade which are included in these Accounts relate only to entrances and clearances "with cargo," that is to say, they include only those vessels which arrive at a port or ports in the United Kingdom for the purpose of discharging cargo from abroad or which depart from a port or ports in the United Kingdom after loading there cargo for discharge at a destination abroad. If cargo is unloaded from, or loaded on, a vessel at more than one port in the United Kingdom without an intervening call at a port abroad, the vessel is recorded as "entered" at one only of such ports of discharge or as "cleared" at one only of such ports of loading. The country from which a vessel is recorded as "entered" on an inward voyage is that of the most distant port at which cargo was loaded for discharge in the United Kingdom on that voyage, whether cargo from other countries is also loaded in the course of the voyage or not. Similarly a vessel is recorded as "cleared" to the country of the most distant port of discharge for cargo loaded on the vessel in the United Kingdom on that voyage.

The shipping of Finland and the movements of vessels to and from Finnish Ports have, from 1st January 1920, not been included with Russian shipping, and with vessels to and from Russian Ports, respectively.

Beginning with 1921 further changes have been made in the classification of shipping movements in accordance with the changes specified in paragraph (5).

Movements of vessels between ports in the United Kingdom for the purpose of completing the discharge of cargo from abroad, or of completing the loading of cargo for abroad, are not recorded as coastwise voyages.

The record of movements of shipping in the Coasting Trade which are included in these Accounts relate only to the arrivals of vessels for the purpose of discharging cargo taken on board at another port, or other ports, in the United Kingdom, and the departures of vessels after loading cargo for discharge at another port, or other ports, in the United Kingdom. Any voyage which includes a call at a port abroad is not deemed to be a coastwise voyage. In the coasting trade, vessels are "entered with cargo" at every port of discharge and are "cleared with cargo" at every port of loading.

The arrivals of vessels at ports at which no cargo is discharged, and of departures of vessels from ports at which no cargo is loaded, are recorded as arrivals and departures "in ballast." Particulars of such arrivals and departures are excluded from the Tables in these Accounts, but are published in the "Annual Statement of the Navigation and Shipping of the United Kingdom."

(11) *Annual Statements.*—Full particulars of the Import and Export trade in each Article and with each Foreign country and British possession are contained in the "Annual Statement of the Trade of the United Kingdom." Detailed information as to Shipping is published in the "Annual Statement of the Navigation and Shipping of the United Kingdom." The 1920 issue of the first volume of the "Annual Statement of Trade" has been published; the second, third, and fourth volumes will be ready shortly.

SUMMARY TABLE showing the VALUE of IMPORTS, BRITISH EXPORTS, FOREIGN and COLONIAL EXPORTS, and TOTAL EXPORTS, for each MONTH in the YEARS 1913 and 1920, and the completed MONTHS of the CURRENT YEAR, exclusive of BULLION and SPECIE.

¶ These quantities represent, in addition to the equivalent of the weight of flour, 28 per cent. of offal, &c., the result of the process of converting grain into flour.

Note.- The equivalents used for converting wheat, barley, and oats from weight to measure are those set out in the Corn Returns Act, 1882, viz. :—60 lbs. to the bushel of wheat, 50 lbs. to the bushel of barley, and 39 lbs. to the bushel of oats.
